

## DT-200/027 model

### Characteristic

Wire resistor type DT-200/027 is composed of two serial connected resistors. These type of resistors are used in car blower unit for step by step control of fan motor speed. All DT-200/027 have a thermal fuse which disconnects blower circuit in emergency situations, after exceeding the specified safety temperature.

Parameter	Value
Operating voltage	12 V
Resistance tolerance	±10 %
